Combustible Gas CiTipeL® Specification

4P-75C CiTipeL®

Performance Characteristics

| Gases Detected | Combustible gases |
|----------------------------------|---|
| Suitable for | methane, ethane, propane, butane, pentane, hexane, carbon monoxide and hydrogen |
| Unsuitable for | higher hydrocarbons, alcohols, ketones, esters, hydrogen sulphide and other sulphur containing compounds |
| Range | 0-100% LEL |
| Operating Voltage | 3.0V d.c. |
| Detector Operating Current | 74±6mA |
| Poison Resistance | Resistant to H_2S poisoning Superior Silicone resistance |
| H ₂ S filter lifetime | typically 1000ppm hr |
| Output Sensitivity | 24±4mV/%methane |
| T ₉₀ Response Time | <20 seconds (methane) |
| Linear to | 3% methane |
| Long Term Sensitivity Drift | <5% signal/month |
| Long Term Zero Drift | <5%LEL _{methane} /month |
| Warranty Period | 12 months from date of despatch |
| N.B. Flow rate of 300 mls | min ⁻¹ . Conditions at 20°C, |

N.B. Flow rate of 300 mls min⁻¹. Conditions at 20°C, 50%RH, and 1013mBar unless otherwise noted.

Relative Sensitivity

The table below shows the response variation of a 4P-75C CiTipeL on exposure to a range of gases and vapours at the same %LEL concentration. The figures are experimentally derived and expressed relative to the methane signal (=100).

| Gas/Vapour | Relative Sensitivity* | Gas/Vapour | Relative Sensitivity* | |
|--|--------------------------|-----------------|--------------------------|--|
| Methane | 100 | Carbon monoxide | 120 | |
| Propane | 65 | Hydrogen | 110 | |
| n-Butane | 65 | Ammonia** | 140 | |
| n-Pentane | 55 | Cyclohexane | 50 | |
| n-Hexane 50 Ethylene 95 | | | | |
| Acetylene | 90 | 1.3 Butadiene | 60 | |
| *Each sensitivity has been rounded to the nearest 5% **T ₉₀ for Ammonia is extended. Contact City Technology for further details | | | | |

Note: The results are intended for guidance only. For the most accurate measurements an instrument should be calibrated using the gas under investigation.

Enhanced Features

- Significantly increased silicone poison resistance
- Significantly increased H₂S resistance
- As with all 4P sensors, excellent shock resistance, reduced orientation effects and wake up times
- Withstands EN 50014 impact test

Combustible Gas CiTipeL® Specification

Note: Temperature and Poison resistance data is supplied for guidance only.

Product Approval

| _ | Approval Body: | CANADIAN STANDARDS ASSOCIATION |
|--------|----------------------|--|
| | Test Standard: | CSA Std C22.2 No 30-M1986 Explosion-Proof Enclosures for Use in Class 1 Hazardous Locations |
| NRTL/Ć | Product Categories: | CSA has evaluated the flame propagation characteristics only of the device for Class I, Division 1, Groups A,B, C and D. |
| | Certificate Number: | CA 103143 |
| | Approval Body: | UNDERWRITERS LABORATORIES INC.® |
| | Test Standard: | UL 913 |
| | Product Categories: | Class 1, Groups A, B, C, D. |

Combustible Gas CiTipeL[®] Specification

Instructions specific to hazardous area installations (reference European ATEX Directive 94 / 9/ EC, Annex II, 1.0.6.)

The following instructions apply to equipment covered by certificate number Sira 01ATEX1205X;

- 1. The equipment may be used with flammable gases and vapours with apparatus groups IIA, IIB and IIC and with temperature classifications T1, T2, T3, T4, T5 and T6.
- 2. The equipment is certified for use in ambient temperatures of -20°C to +40°C.
- 3. The equipment has not been assessed as a safety related device (as referred to by Directive 94 / 9 / EC Annex II, clause 1.5).
- 4. Installation of the equipment shall be carried out by suitably trained personnel in accordance with the applicable code of practice (e.g. EN 60079-14)
- 5. Inspection and maintenance of this equipment shall be carried out by suitably trained personnel in accordance with the applicable code of practice (e.g. EN 60079-17).
- 6. Repair of this equipment shall be carried out by suitably trained personnel in accordance with the applicable code of practice (e.g. EN 60079-19).
- 7. Special conditions for safe use
- 7.1. Matrix of limitations

| | DW30 | CW2248 |
|--------------|-------------------------------|-------------------------------|
| 0.5W | \checkmark | \checkmark |
| 1W | \checkmark | \checkmark |
| Fitted with | \checkmark | \checkmark |
| Plastic Disc | The disc must be protected | The disc must be protected |
| | from impact | from impact |

- 7.2. The 4P Series Sensing Head is designed to be connected to a gas detector which shall provide an intrinsically safe supply and having a maximum output power (P_0) not greater than the wattage detailed in the matrix above.
- 8. It is recommended that confirmation of adequate sensor performance be conducted on a regular basis by means of a defined, sensor calibration procedure. The calibration frequency will depend upon the environment in which the sensor is operated and on the perceived level of risk from the build up of flammable atmospheres.

| ent: | DW30 | CW2248/HY956EN |
| Manufacturer | Flogates & Hikley | Ciba-Geigy |
| Type of compound | Ceramic cement | Epoxy resin |
| Colour | Off white | Beige (natural) |
| Filler type and % | 40% silica | 55.2% trihydrated Al ₂ O ₃ |
| Other additives | 25% MgO | 8.3% |
| | $35\% \text{ MgSO}_{4}$ | |
| Surface treatments | s None | None |

Temperature index City Tech reference Stable to 475°C 170°C

RM 462 RM 497 If the equipment is likely to come into contact with aggressive substances, then it is the responsibility of the user to take suitable precautions that prevent it from being adversely affected, thus ensuring that the type of protection is not compromised.

Aggressive substances: e.g. acidic liquids or gases that may attack metals, or solvents that may affect polymeric materials.

Suitable precautions:

regular checks as part of routine inspections or establishing from the material's data sheet that it is resistant to specific chemicals.

The 4P Series Gas Sensing Head is available in several formats depending upon the operating 10. voltage of the sensing elements. The Certification marking is shown below using the 4P-75 Gas Sensing Head as an example:

| | CiTipeL [®] | | SIRA01ATEX1205X EEx d IIC T6 | | |
|------------|-----------------------------|-----|---------------------------------|--|--|
| | 4P-75 | S/N | (€x) II2G | | |
| TECHNOLDEY | PO6 1SZ, U | K | € 0518 Pi=1W | | |

11. Certain substances are known to have a detrimental effect on catalytic elements as used in the 4PSeries Gas Sensing Head.

Poisoning: some compounds will decompose on the catalyst and form a solid barrier over the catalyst surface. This action is cumulative and prolonged exposure will result in an irreversible decrease in sensitivity. The most common of these substances are: lead or sulphur containing compounds; silicones; phosphates.

certain other compounds, especially hydrogen sulphide and halogenated hydrocarbons, Inhibition: are absorbed or form compounds that are absorbed by the catalyst. The resultant loss of sensitivity is temporary and in most cases a sensor will recover after a period of operation in clean air.

In applications where it is suspected that poisons or inhibitors may be present, suitable protection for the 4P Series Gas Sensing Head should be provided.

Every effort has been made to ensure the accuracy of this document at the time of printing. In accordance with the company's policy of continued product improvement City Technology Limited reserves the right to make product changes without notice. No liability is accepted for any consequential losses, injury or damage resulting from the use of this document or from any omissions or errors herein. The data is given for guidance only. It does not constitute a specification or an offer for sale. The products are always subject to a programme of improvement and testing which may result in some changes in the characteristics quoted. As the products may be used by the client in circumstances beyond the knowledge and control of City Technology Limited, we cannot give any warranty as to the relevance of these particulars to an application. It is the clients' responsibility to carry out the necessary tests to determine the usefulness of the products and to ensure their safety of operation in a particular application.

Performance characteristics on this data sheet outline the performance of newly supplied sensors. Output signal can drift below the lower limit over time.
