Description

The P528 incorporates Kavlico's 4th generation ceramic capacitive sense element with the latest state-of-the-art ASIC. Available with a brass or stainless steel housing, the P528 has been specifically designed for high volume OEM refrigeration applications. It can endure the high vibration, broad temperature ranges and humidity conditions found in refrigeration systems while withstanding high over-pressures and pressure pulsations without damage or degradation.

The P528 package has a built-in Metri-Pack 150, electrical connector and supports male and female pressure connections. The P528 is offered with seal materials that are suitable for many of the latest refrigerants such as R134a, R22, R123, R12, R410A, including many of the proprietary blends, and associated lubricants.
